Response

EQUALITY:

Everyone gets the same – regardless if it's needed or right for them.

EQUITY:

Everyone gets what they need – understanding the barriers, circumstances, and conditions.

Qualitative Data Scoping Interviews

Health and wellbeing perspectives from <u>200</u> providers and community members Identified and interviewed key informants in various health professions, community agencies, and community groups.

- Health care, social service, non profit organization providers
- Unique needs by lifestage
- Individuals who face wide range of disparities

All of what we have learned falls under one or more of the social determinants of health.

Social Determinants of Health (SDOH)

The conditions in the environments where people are born, live, learn, work, play, worship, and age that affect a wide range of health, functioning, and quality-of-life outcomes and risks.

The breadth of services available LAPS provide robust public education • LANL- a large A relatively safe community employer ا ا ا The People of Los Alamos Social Determinants of Health ப் Healthy People 2030 Copyright-free

Decrease in social skills including speech of children.

Loss of pandemic relief funds pushed some families over the edge.

Increased need to go out of town for medical services.

Elderly became more isolated.

Mental health, substance misuse, child neglect worsened during pandemic.

healthy People 2030 الله

Youth who are on cusp of needing additional services but do not qualify.

Economic challenges of non-LANL employees and those on fixedincome. Accessing Primary Care, Specialists, and Mental Health Services.

Needs for improving accessible housing in the community.

Lack of opportunity for meaningful connections: among residents and between LAC and neighboring communities.
