Los Alamos County Fleet Conversion and Community-Wide Electric Vehicle Charging Plan

FACT SHEET

PROJECT OVERVIEW

Los Alamos County is planning to:

- Transition its County fleet to low and zero-emission vehicles.
- Expand electric vehicle (EV) charging stations throughout the community.

These actions support Los Alamos' Climate Action Plan goals to cut greenhouse gas (GHG) emissions by 30% by 2030, 80% by 2040 and 100% by 2050. This project aligns with the New Mexico's Clean Car Rule, which targets 82% of new vehicle sales to be low-or zero-emission by 2032.

PROJECT GOALS

1. Cut Emissions – Lower GHG emissions and reduce air pollution from County fleet and community transportation.
2. Expand Charging Access – Build a robust, accessible EV charging network.
3. Community Collaboration – Work with residents and community partners to guide planning and ensure equitable, long-term success.

PUBLIC EV CHARGING READINESS PLAN

Los Alamos County is studying how to make EV ownership easier by:

- Reviewing relevant plans, zoning, and permitting rules.
- Identifying ideal charging station locations based on demand, site suitability, accessibility, and equity.
- Making cost-effective investments that benefit the community.

HOW TO GET AND STAY INVOLVED

- Visit the project website for updates www.losalamosnm.us

LOS ALAMOS

Los Alamos County Fleet Conversion and Community-Wide Electric Vehicle Charging Plan

Public Workshop

Monday
May 12, 2025

Council Chambers
1000 Central Avenue
Los Alamos, NM

3:30 - 6:30 PM

Presentations scheduled at 4:00 PM and 5:30 PM

Los Alamos County wants your input

Help Shape the Future of EVs in Our Community

We're gathering input from residents, business owners, and employees to plan for a more electric future. Whether you own an EV, drive one for work, or are thinking about converting to EV, your voice matters.
