**QUESTIONS AND ANSWERS**

1. QUESTION: Regarding contractor licensing, does the work require a GF-1 or GF-98, or does a GB-98 suffice?

ANSWER: The work is not in an area subject to the takeoff, landing or taxiing of aircraft, so the GF-1 license is not anticipated. The drainage work, including the trench drain, inlet and pipe connection to the existing drainage system, will require a GF-4 license. Since the drainage work is incidental to the major item of work on the project, the work may be subcontracted to a validly licensed contractor. Reference is directed to Section 14.6.6.8 of the New Mexico Administrative Code (NMAC).
