

Family Food Waste Prevention Pledge

Taking the Family Food Waste Prevention Pledge will save your household up to \$1,500 per year and significantly reduce the amount of wasted food that goes into our landfill.

The Pledge

- We will not waste food on our plates: at home, in lunches, or eating out.
 - We will make a shopping list before going to the grocery store.
- We will “shop” in our own fridge and pantry to know what we already have.
 - We will not overlook slightly imperfect produce.
 - We will use older food **FIRST** before using newer food.
 - We will plan for leftovers **and** eat them.
 - We will freeze excess food to be used at a later time.
 - We will properly store dairy, fruits & veggies to ensure a longer shelf life.
 - We will share excess food with others to be sure it does not go to waste.
 - We will encourage others to reduce their food waste.
- We will use our senses to see if food is still good, and not go solely by the “best by” date.
- We will designate one day per week to be “Just Eat It” Day, to use up leftover food.
